What does your 100% Satisfaction Guarantee mean?

Our 100% Satisfaction Guarantee means we guarantee you will be satisfied with your Mob Armor Product, or we will refund your money. If you are unsatisfied with your product at any time within 30 days of your purchase, you can return it to us for a full refund, no questions asked. You pay shipping back to us. We do not refund any shipping cost.

What warranty does Mob Armor offer?

The Mob Armor Warranty covers all defects in workmanship or materials of our products for up to one year. This warranty applies only to the original purchaser at retail and may not be transferred. This warranty only covers defects arising under normal usage and does not cover any malfunction, damage or failure due to accident, misuse, abuse, neglect, alteration, modification or repair by other than an authorized service center for Mob Armor products. Scratching of the powder-coated surface, anodizing or plastic constitutes normal wear and is not covered under warranty. For complete warranty information please visit **mobarmor.com/warranty**

MAGNETIC **GO**
PRODUCT INSTRUCTIONS

MOB ARMOR

SKU: MOBN-GO-BLK REV 62723

STEP #1 - DETERMINE CHARGING METHOD
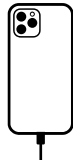

Determine primary charging method (Qi Wireless / Apple MagSafe, or conventional wired charging). Once determined, locate the position most accessible on the back of the mobile device and the mounting surface that would allow proper final mounting orientation specified to the user.

WIRELESS CHARGING
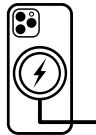

CONVENTIONAL WIRED CHARGING

Some Qi Wireless Charging / Apple MagSafe compatible devices are too small to adhere a MobNetic Device Plate to without hindering the wireless charging functions (for example, an iPhone 12/13 Mini).

If you would like to mount your device at times without using a wireless charger, please check out our Mag FLEX Plate paired with the FLEX Retro Cap as an alternative to the MobNetic Device Plate.

⚠ WARNING:

This product contains powerful magnet(s). Not for use around individuals with pacemakers.

## STEP #2 - DETERMINE MOUNTING LOCATION

QI WIRELESS / APPLE MAGSAFE CHARGING

Locate the desired position of the MobNetic Device Plate on the back of the middle of the device, keeping in mind how the phone will attach to the mount (see figure below). Keep the MobNetic Device Plate mounting location out of the area of wireless charging and assure there is enough space on the case or mobile device. Once this location is determined, continue to Step #3 and prepare the surface in order to accept the VHB adhesive.
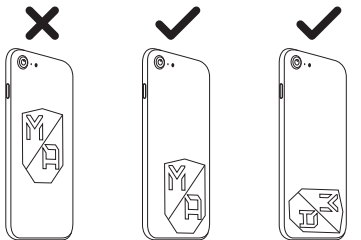

CONVENTIONAL WIRED CHARGING

Locate the desired position of the MobNetic Device Plate on the back of the device that has a flat and even surface. Once this location is determined, continue to Step #3 and prepare the surface in order to accept the VHB adhesive.
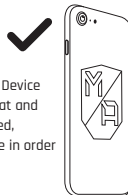

STEP #3 - MOUNTING SURFACE PREPARATION

During this step it is crucial to have clean hands as to not reintroduce contaminants to the surface of the device. Make sure the mounting location surface is a flat, non-porous surface that is oil free and clean of debris. Use the included wipes to clean the surface just before mounting the MobNetic Device Plate. Wait at least 60 seconds for cleaning solutions to dry completely.

STEP #4 - ATTACHMENT AND SETTING BEFORE USE

Once the surface has dried completely, prepare the MobNetic Device Plate by removing the backing from the adhesive, and pressing onto device surface. Apply moderate pressure for at least 60 seconds to ensure proper adhesion. DO NOT MOUNT YOUR PHONE YET. Allow at least 24 hours for the adhesive to fully cure.

STEP #5 - MOUNTING DISC APPLICATION

Mounting Discs are meant for use on non-ferrous surfaces you wish to mount on. Any even, solid, non-porous surface will work (do not mount on a soft dashboard). Please refer to the "Mounting Disc Application Instructions" card in the packaging for full instructions.
